Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, there is no support found in the specification for the “first current limiter” being “programmable”. The only element seen to be “programmable” is the current mirror M1-M3, however, the current mirror hasn’t been recited in claim 1.

In claim 6, there is no support found in the specification for the “first current limiter” including two current sources. All of the figures show only one current source for each “limiter”.

Claim 7 is rejected as including the indefiniteness discussed above with claim 6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 and 30-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Hur et al. (UPSN 6,201,436).

With respect to claims 1-11, Hur et al. disclose, in Fig. 1, a circuit comprising: “an input current (I1)”; “a first current limiter (20 and 32)”; “a second current limiter (31)”; and “a node (D)”, all connected and operating similarly as recited by Applicant.

With respect to claims 30-39, clearly the above circuit to Hur et al. will provide the recited method.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference is made to the reference to Kirkland et al.

Allowable Subject Matter

Claims 12-29 are deemed allowable because none of the cited prior art reference teach the wherein each of the “input current mirror”, the “first current limiter” and the “second current limiter” include all of the recited elements.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terry Cunningham whose telephone number is 571-272-1742. The examiner can normally be reached on Monday-Thursday from 7:30 to 6:00.
